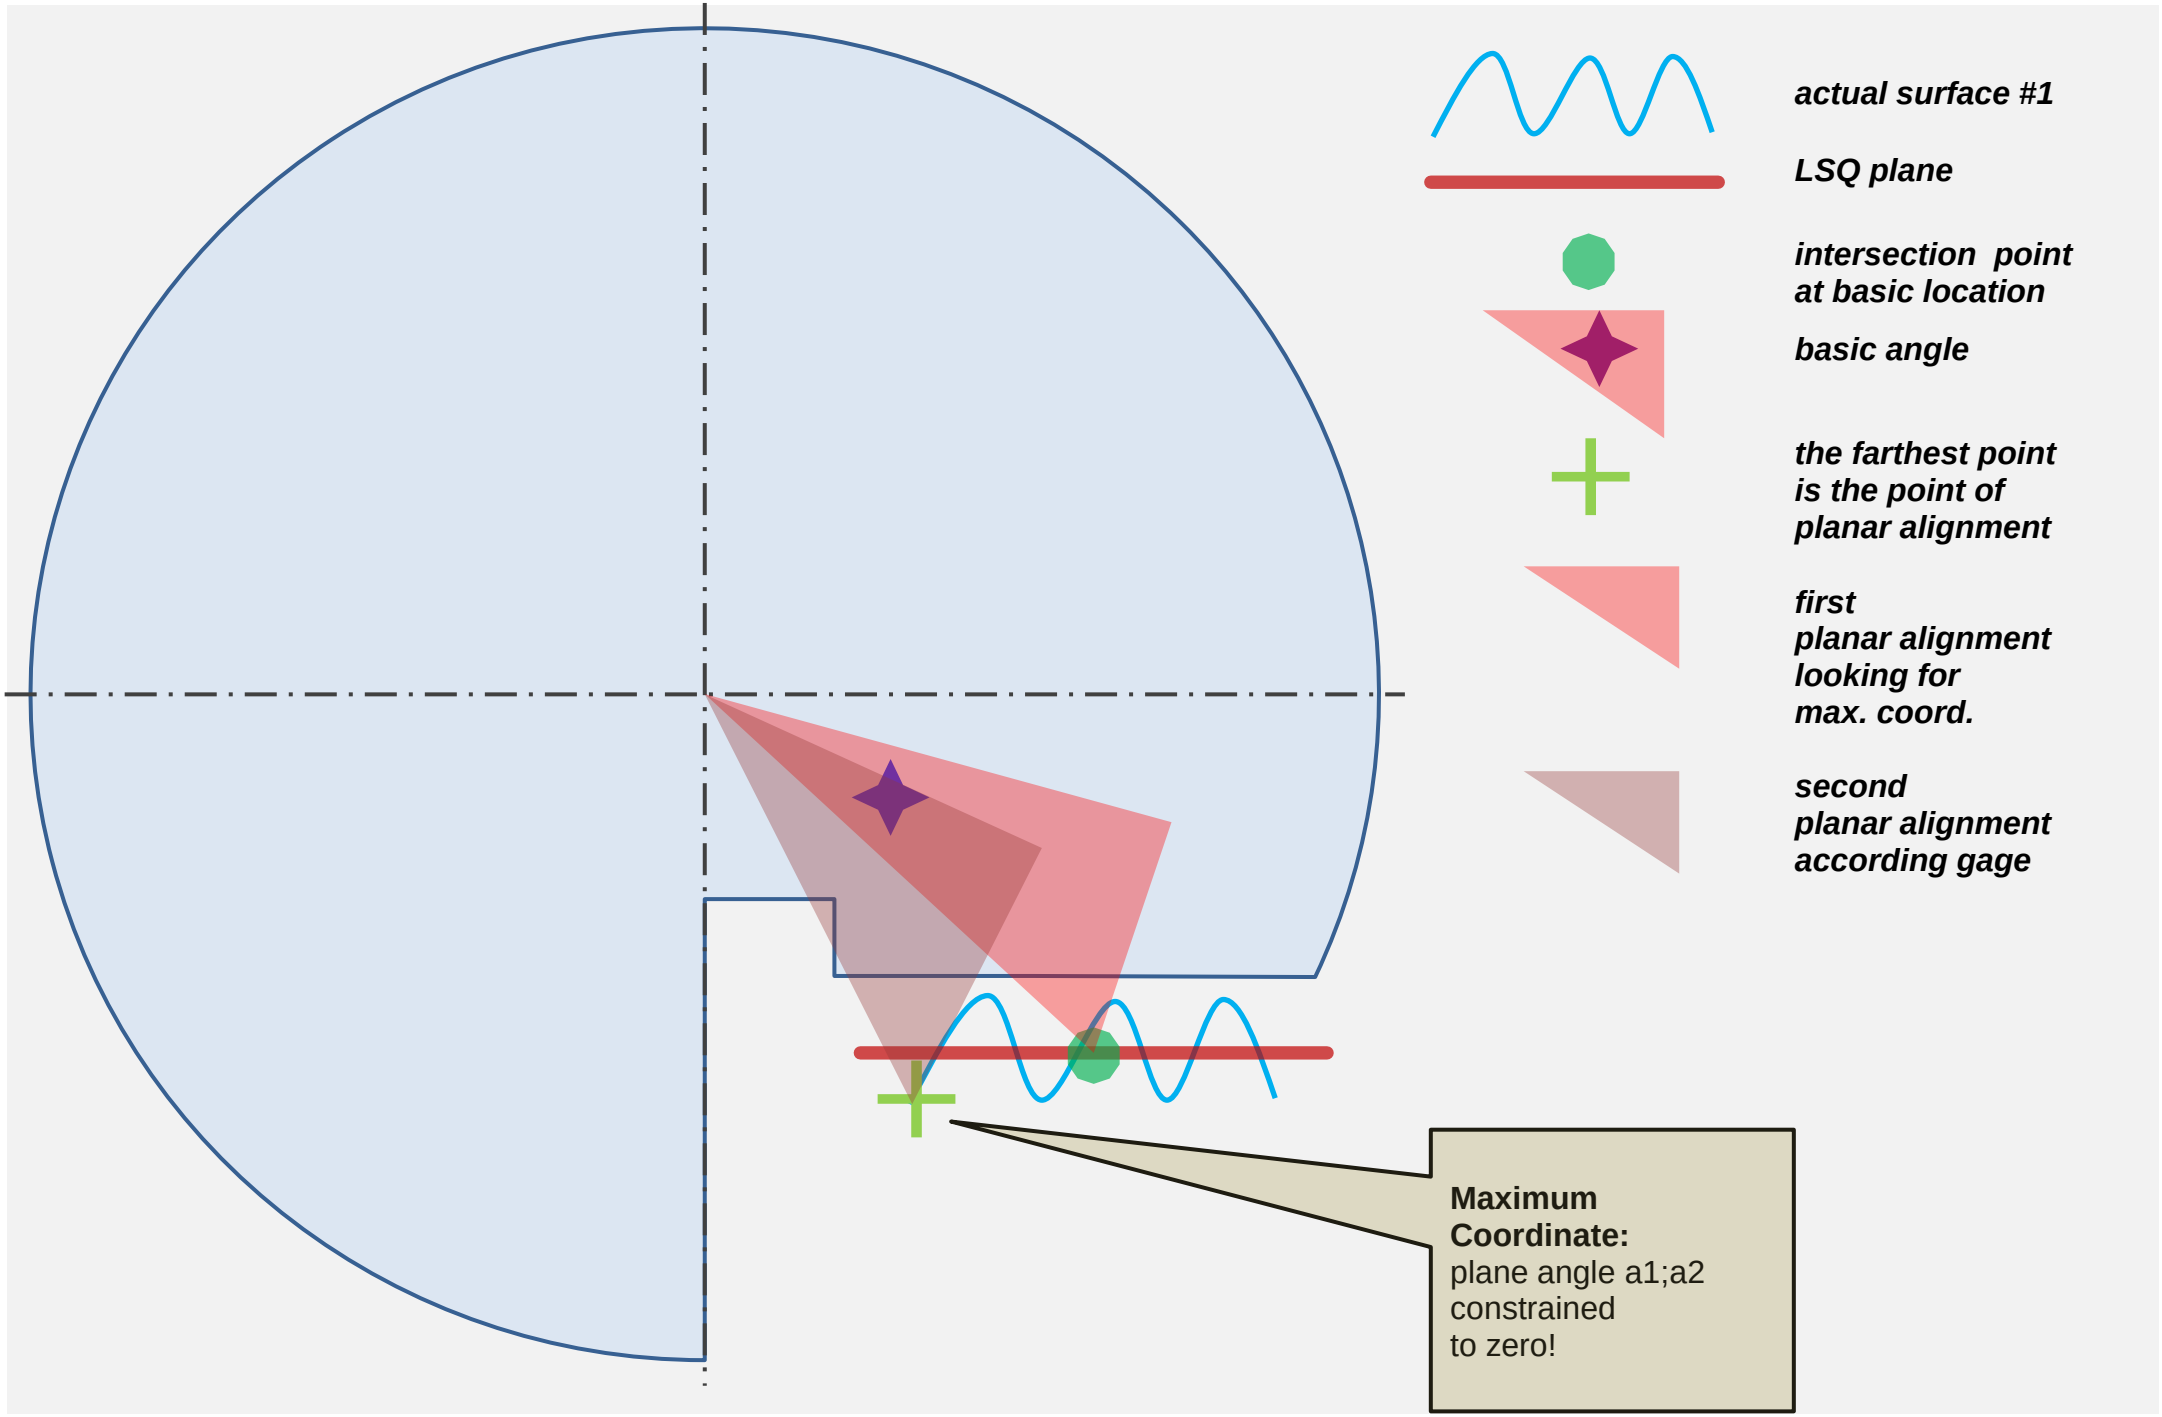
actual surface #2
LSQ plane
intersection point at basic location
basic angle
the farthest point is the point of planar alignment
first planar alignment looking for max. coord.
second planar alignment according gage
Maximum Coordinate:
plane angle a1;a2 constrained to zero!



actual surface #1
LSQ plane
intersection point at basic location
basic angle
the farthest point is the point of planar alignment
first planar alignment looking for max. coord.
second planar alignment according gage
Maximum Coordinate:
plane angle a1;a2 constrained to zero!
