1. Make a stylus system like this.

Extension

First Generic cube 1 20x20x10

5 Generic cubes 20x20x5. With one stylus each. First one roated 0°, the next one 72°, 144 and so on.

Last Generic cube 1 20x20x10

2. Reduce the z-lenght of the 5 red cubes to 0. All of them will occupy the same space but will look decent for you to make simulations and Zeiss will understand what you need.
