

M10 X 1.5 - 6H

	$\varnothing 0.3$	M	P	14	A
--	-------------------	----------	----------	----	---

MMC on a projection?

Reference length without location!

A

Could be everywhere

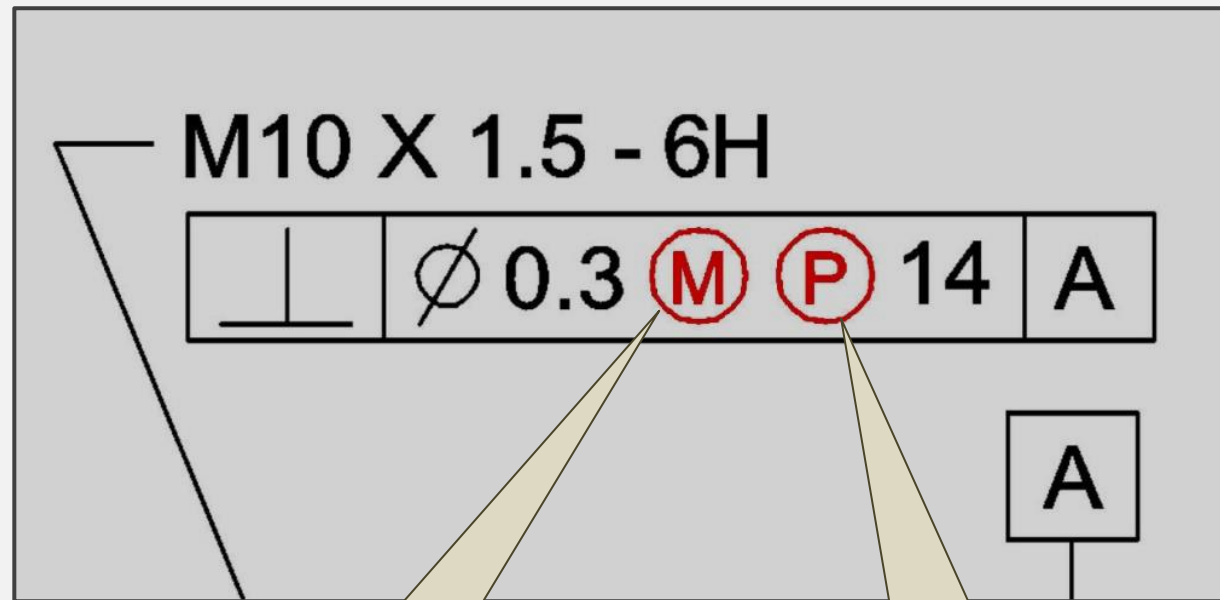

Perpendicularity

0,1831°

14,0000

0,0447

totally bogus!

*MMC can only apply
to real existent
geometries!*

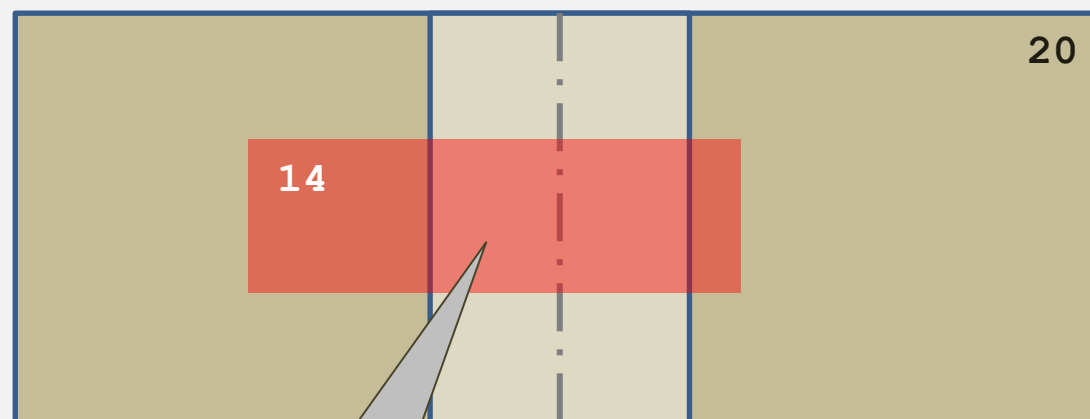

*(P) in the sense of
"Reference length"
forbides the input
of MMC*

real length of bore=20

reference length =14

Meaning:

MMC on Perpendicularity not allowed!

*(P) in the sense
of reference length*
