

Parallelism and Projected Zone

Designer's decision.

Not necessarily according standard.

This callout forces the user to apply Least Squares-evaluation.

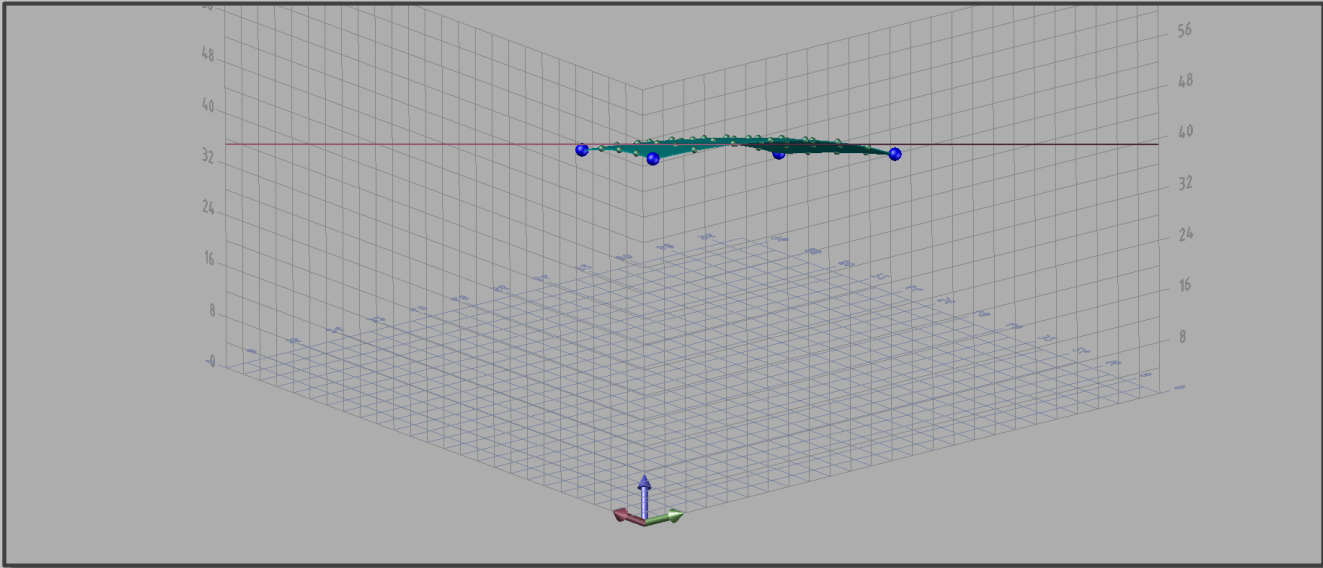

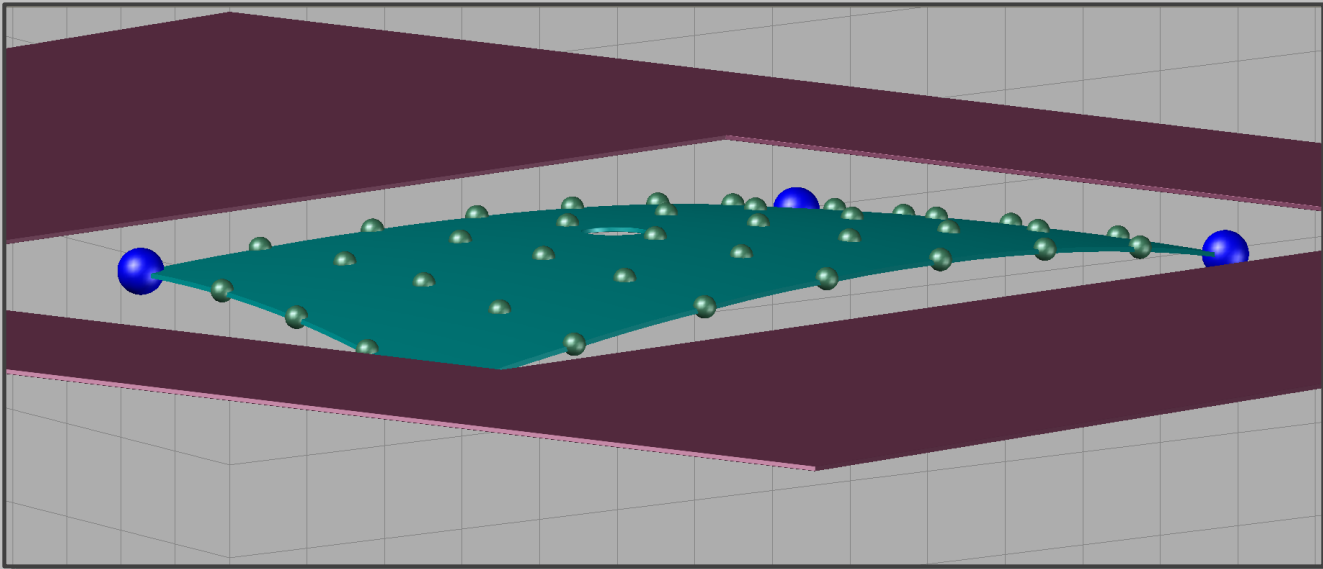

Parallelism and Projected Zone

Creation of an alignment in order to construct a "Plane-Vector".

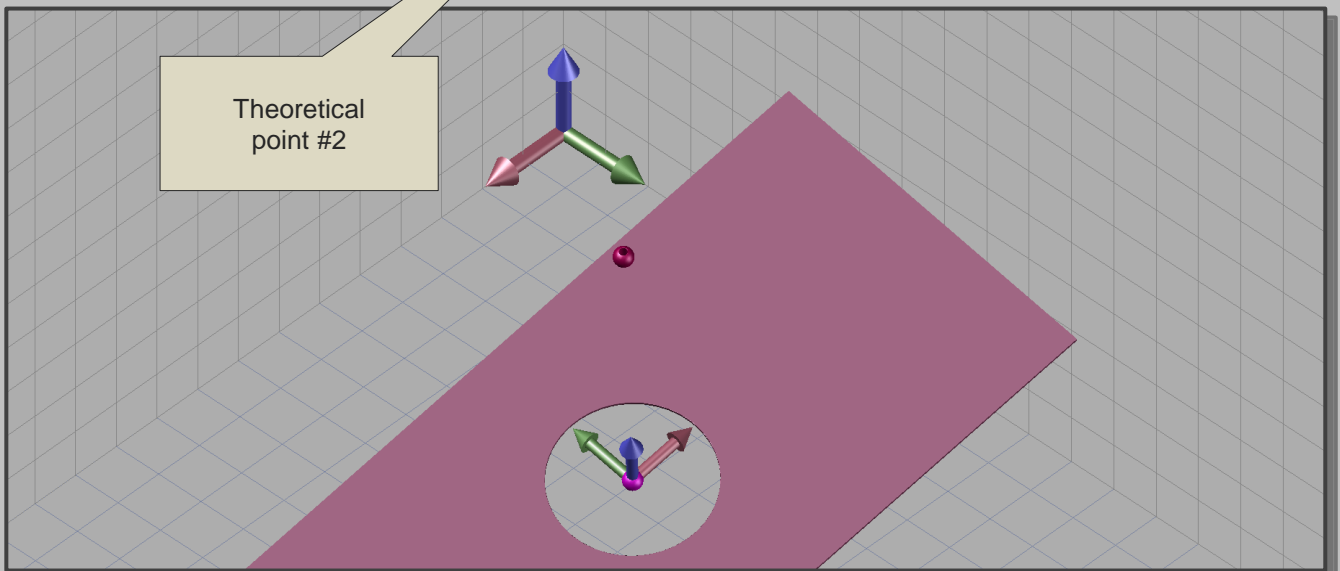

"Point of Gravity" as the origin is optional.

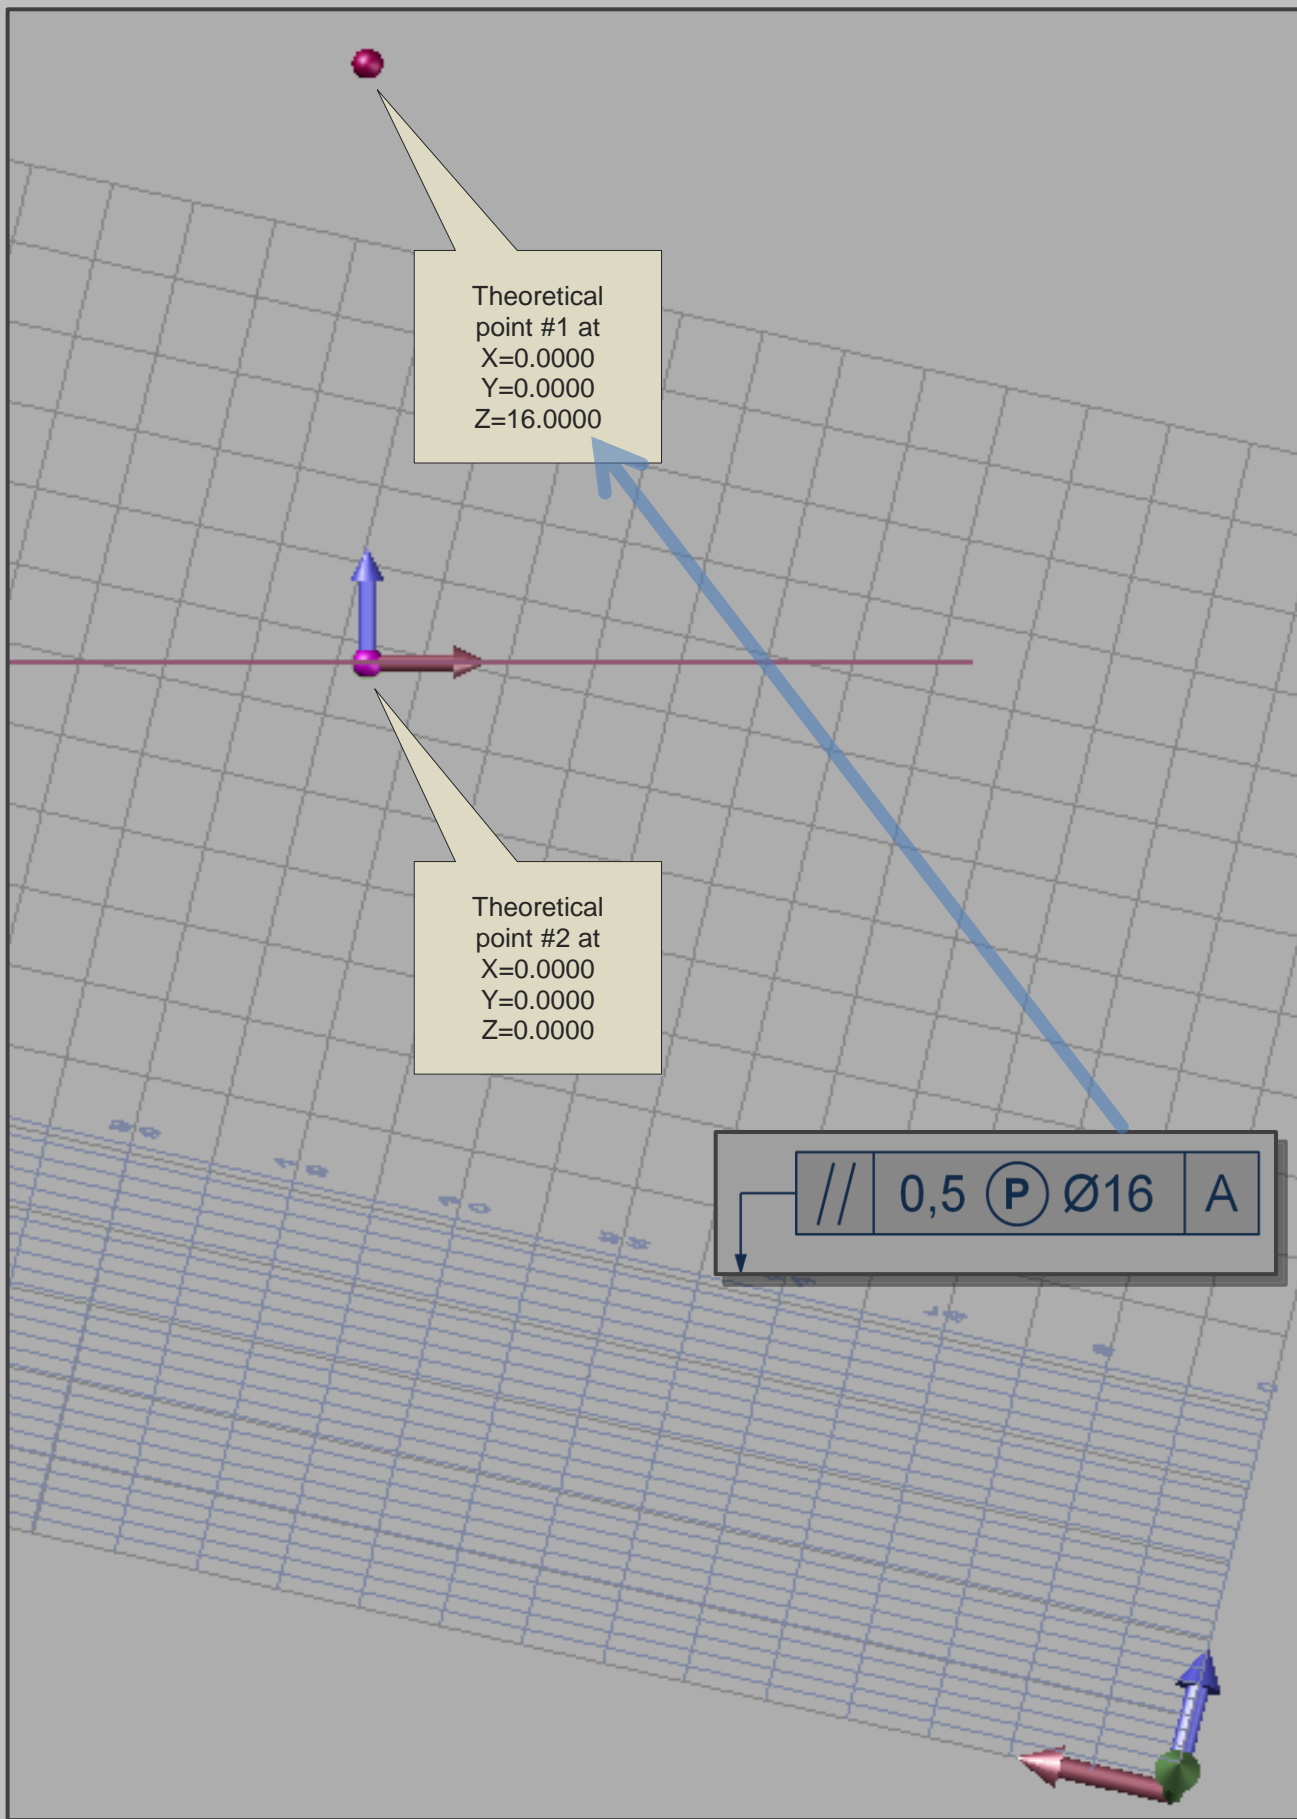

Spatial alignment
of Least Squares plane.
Point of gravity is
origin in X/Y/Z.
Planar alignment optional.

Point of
gravity

Parallelism and Projected Zone

Parallelism and Projected Zone

Parallelism and Projected Zone

Theoretical point #1 at
X=0.0000
Y=0.0000
Z=16.0000

Theoretical point #2 at
X=0.0000
Y=0.0000
Z=0.0000

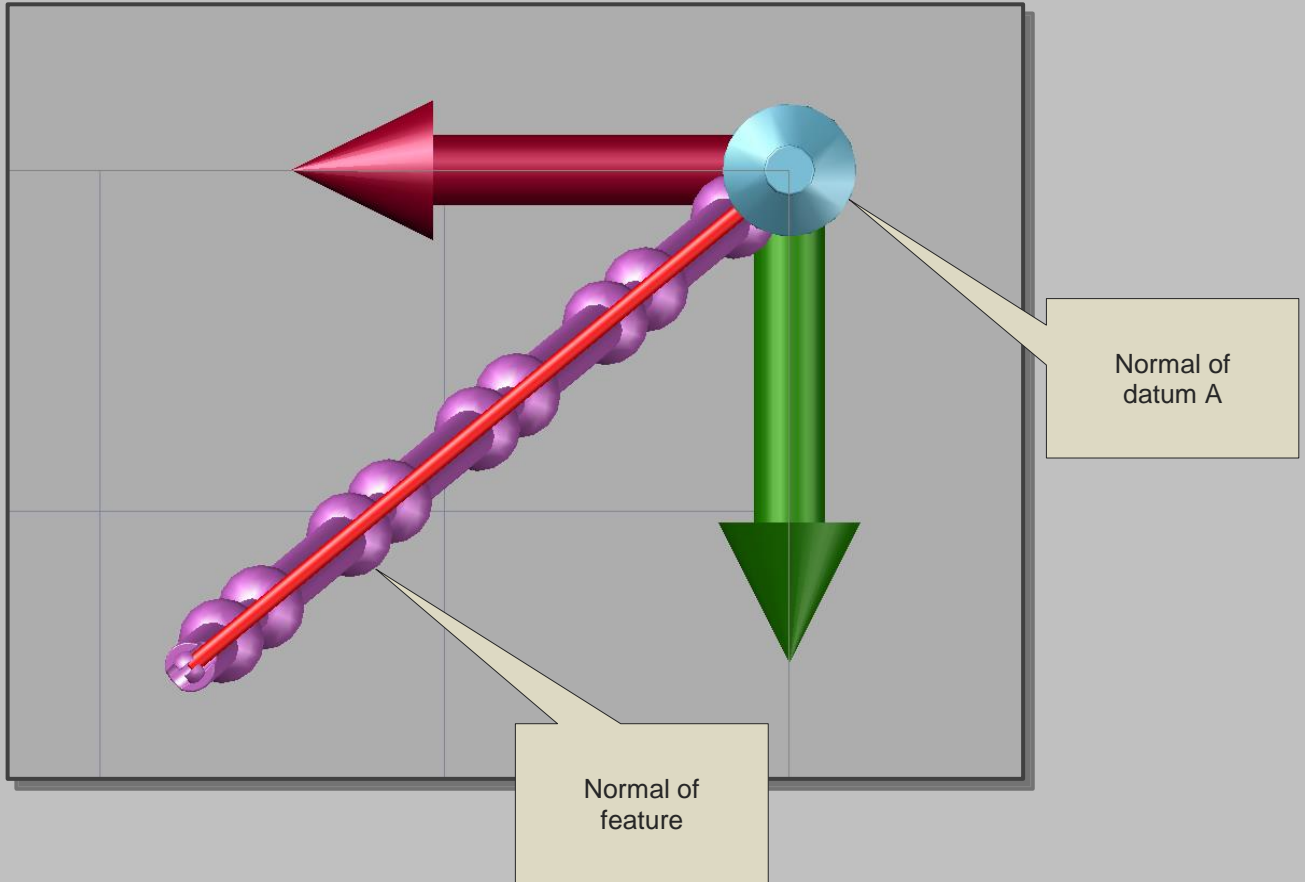

3D Line
made of
two points

A feature of Parallelism
